DATE FILED: October 12, 1998

PARENT-CASE:

CROSS-REFERENCE TO RELATED APPLICATION This application claims benefit of co-pending U.S. Provisional Application No. 60/062,410, entitled "Systems and Methods for Electronic Trading of Financial Contracts," and filed Oct. 14, 1997. In addition, the present application is related to the following co-pending, commonly assigned U.S. applications, each of which is incorporated by reference as if set forth in full: "Systems, Methods And Computer Program Products For Subject-Based Addressing In An Electronic Trading System," filed Oct. 12, 1998, and accorded application Ser. No.: 09-169,767; "Systems, Methods And Computer Program Products For Monitoring Credit Risks In Electronic Trading Systems," filed Oct. 12, 1998, and accorded application Ser. No.: 09/169,878; and "Switch Engine For Risk Position Discovery In An Electronic Trading System," filed Oct. 12, 1998, and accorded application Ser. No.: 09/169,879.

ATTY-AGENT-FIRM: Alston & Bird LLP

ABSTRACT:

An internet-protocol based anonymous trading system which enables traders to identify bids and offers which they are eligible to trade based upon a color coded methodology which gives the trader credit preference information about the potential counterparty while still maintaining the anonymity of the potential counterparty. To that end, each bid or offer is prescreened against all possible counterparties' credit information in the system and each counterparty sees a unique color coded trading interface based upon their particular credit preference combinations and the others in the system. The system then shows all prices in the system, and the color-coding tells the trader which prices he is able to trade, and also shows him the full depth of the market, including those the trader is unable

to trade.
